## Chapman Valley (S)

Prepared from Community Explorer topic selections for briefing, planning and reporting use.

AREA

**Chapman Valley (S)**

COMPARISON

**Regional WA**

POPULATION

**Persons**

GENERATED

**2 April 2026**

### Included sections

1 selected topic will be included in this report.

**01** Need for assistance

### Sources and method

- Source: Australian Bureau of Statistics, Census of Population and Housing, 2021 and, where available, 2016 comparison data.
- Percentages are calculated from the denominator supplied for each topic. Change (pp) is the 2021 percentage minus the 2016 percentage when the topic is comparable across years.
- Usual residence topics describe where people usually live, rather than where they were counted on Census night.

# Need for assistance

Chapman Valley (S) | Regional WA comparison | Persons

Community report section 1 of 1

## Key takeaway

In 2021, 55–64 year olds was the most common age group among residents who needed assistance with core activities in Chapman Valley (S), accounting for 4.3% (11 people). This share was similar to Regional WA (4.2%). Since 2016, the biggest change was in 85+ year olds, which increased by 6 people and 66.7 percentage points.

## About this topic

Need for assistance measures people who report needing help with self-care, body movement, or communication because of a disability, a long-term health condition, or older age. It is a high-needs indicator rather than a general measure of disability.

This topic is useful for planning accessible facilities, care services, respite, and support for carers. The measure is based on self-report in the Census, so it should be interpreted with care and read alongside unpaid care and other disability-related indicators.

## Interpretation notes

- The measure is self-reported and records need for help with core activities, so it is not a complete measure of disability prevalence.
- It applies to all persons and is strongest as an indicator of higher support need when read with unpaid care and ageing data.

## Need for assistance with core activities by age
