### Included sections

1 selected topic will be included in this report.

**01** Unpaid care

### Sources and method

- Source: Australian Bureau of Statistics, Census of Population and Housing, 2021 and, where available, 2016 comparison data.
- Percentages are calculated from the denominator supplied for each topic. Change (pp) is the 2021 percentage minus the 2016 percentage when the topic is comparable across years.
- Usual residence topics describe where people usually live, rather than where they were counted on Census night.

# Unpaid care

East Arnhem (R) | Regional NT comparison | Persons

Community report section 1 of 1

## Key takeaway

In 2021, not providing unpaid care was the most common response among residents aged 15 and over in East Arnhem (R), accounting for 73.1% (4,932 people). This share was lower than Regional NT (76.6%). Since 2016, the biggest change was in not providing unpaid care, which increased by 913 people and 10.6 percentage points.

## About this topic

Unpaid care records whether people aged 15 years and over spent time providing unpaid help or assistance to someone because of disability, long-term illness, or problems related to old age. It captures informal care provided by family members or others in the community.

This topic is useful for understanding the demand placed on informal carers and the likely need for support services, respite, and home-based assistance. It does not measure the intensity or duration of care, so it should be read alongside need for assistance and other health and ageing indicators.

## Interpretation notes

- This records whether a person aged 15 years and over provided unpaid help or assistance in the previous two weeks because of disability, long-term illness, or old age.

- It identifies whether care was provided, not the intensity, frequency, or number of hours of care.

## Unpaid care
