Key takeaway

In 2021, intact families was the most common family type among couple families with children in Gosnells (C), accounting for 84.9% (14,214 families). This share was higher than Greater Perth (82.9%). Since 2016, the biggest change was in step families, which increased by 906 families and 5 percentage points.

About this topic

Family blending classifies couple families with children according to whether the children are shared by both partners, from a previous relationship, or a mix of both. It applies only to couple families with children, not to all family types or all households.

This topic can help show patterns of repartnering and family complexity within an area. It should be interpreted with household type and households with children, because it is a specialised family-structure measure rather than a summary of all families.

Interpretation notes

- This derived family view applies only to couple families with children, not all families or all households.

- It classifies whether children are shared, step, or blended within the couple family, so it should not be compared directly with headline household totals.
