## Key takeaway

In 2021, 2001 to 2010 was the most common arrival period among overseas-born residents in Greater Dandenong (C), accounting for 21% (19,324 people). This share was lower than Greater Melbourne (22.7%).

## About this topic

Overseas arrivals groups the overseas-born population by the year they first arrived in Australia to live here for one year or more. It shows how recent or established migrant communities are within an area.

This topic only applies to people born overseas, not the total population. It is useful for understanding settlement trends and likely demand for newcomer services, and it is best read with birthplace, language used at home, and religion.

## Interpretation notes

- This topic applies only to overseas-born people who first arrived to live in Australia for one year or more, not to the total population.
- Year of arrival is most useful with birthplace and language, because arrival timing alone does not show current support needs.
