Sources and method

- Source: Australian Bureau of Statistics, Census of Population and Housing, 2021 and, where available, 2016 comparison data.
- Percentages are calculated from the denominator supplied for each topic. Change (pp) is the 2021 percentage minus the 2016 percentage when the topic is comparable across years.
- Usual residence topics describe where people usually live, rather than where they were counted on Census night.

Key takeaway

In 2021, Employed was the most common category among residents aged 15 and over in Lockyer Valley (R), accounting for 94.7% (17,963 people). This share was similar to Regional Qld (94.8%). Since 2016, the biggest change was in Employed, which increased by 2,201 people and 2.8 percentage points.

About this topic

Employment status shows whether people aged 15 years and over are employed full-time or part-time, unemployed, or not in the labour force. It is one of the main Census indicators of labour market participation and economic engagement.

This topic is useful for understanding workforce participation, unemployment, and the broader socio-economic profile of an area. Results from 2021 should be read carefully because COVID-19 restrictions increased the number of people who were employed but away from work around Census time.

Interpretation notes

– Labour force status is based on the week before Census night for people aged 15 years and over.

– In 2021, lockdown instructions could shift more people into 'employed, away from work', so over-time comparisons need care.

– The 'away from work' group also includes people who reported having a job but did not state hours worked.
