Key takeaway

In 2021, 3-bedroom dwellings was the most common bedroom count among occupied private dwellings in MacDonnell (R), accounting for 33.4% (586 dwellings). This share was lower than Regional NT (33.9%). Since 2016, the biggest change was in 0 or 1 bedrooms, which increased by 241 dwellings and 12.4 percentage points.

About this topic

Number of bedrooms per dwelling records the bedroom count of occupied private dwellings. It is a simple but useful indicator of dwelling size and housing capacity.

This topic is most informative when read with dwelling type, household size, and household type. Together, these measures can help identify whether housing stock is suited to local household needs and can signal issues such as crowding or affordability pressure.

Interpretation notes

- The count refers to bedrooms in occupied private dwellings, not the total number of rooms.

- Bedroom count can suggest dwelling capacity, but it should be read with household size, before drawing conclusions about crowding.
