About this topic

Unpaid childcare records whether people aged 15 years and over spent time looking after a child without pay, including their own children and other people's children. It reflects the role of parents, grandparents, extended family, and community networks in caring for children.

This topic helps show how childcare is supported outside the paid care sector and can highlight the role of family-based care. It is best interpreted with household type, employment, and income, because unpaid childcare patterns are shaped by family structure, work arrangements, and access to formal childcare.
