## Key takeaway

In 2021, separate houses was the most common dwelling type among dwellings in Port Adelaide Enfield (C), accounting for 70.2% (37,133 dwellings). This share was lower than Greater Adelaide (74.4%). Since 2016, the biggest change was in separate houses, which increased by 3,623 dwellings and 1.5 percentage points.

## About this topic

Dwelling type shows the structure of dwellings, such as separate houses, medium density housing, and higher density housing. It is a core measure of built form and residential density within an area.

This topic helps explain the housing role of an area and the kinds of households it may attract. It is best read with household size, household type, tenure, and age structure, because built form and population characteristics are closely related.

## Interpretation notes

- Dwelling structure describes the physical form of dwellings counted on Census night rather than tenure, housing condition, or household makeup.

- It is strongest when read alongside household size and tenure, because structure alone does not show who lives there.
